

This PDF document is an updated note on the company. A comprehensive version of the report on the company, including this latest update, is available on [our website](#) and various professional platforms.

On January 21, 2021, Infomart Corporation announced revisions to its forecasts for FY12/20.

Infomart announced upward revisions to its forecasts for FY12/20 on the view that results would exceed its prior forecasts, announced on July 31, 2020 (sales of JPY8.7bn, operating profit of JPY1.1bn, and net income of JPY744mn). It now forecasts sales of JPY8.8bn (+2.8% YoY), operating profit of JPY1.5bn (-40.3% YoY), net income of JPY956mn (-43.6% YoY), and EPS of JPY4.18. Previously, Infomart had assumed that the impact from the pandemic would be prolonged, and that the procurement amount from restaurants using B2B Platform Ordering in the B2B Platform Food segment would continue to decrease YoY. However, since Q3, the procurement amount has trended ahead of the company's forecasts, and sales in the form of pay-per-use system fees from food wholesalers—the sellers—have increased more than expected. In addition, the cost of sales (including data center costs and software depreciation) has decreased more than initially planned, and in SG&A expenses, travel expenses are expected to have decreased as a result of restrained domestic business travel. Due to these reasons, Infomart upgraded its forecasts. The company has left its dividend plan for full-year FY12/20 unchanged at JPY3.71 per share.
